Steelcase Environmental Commitment

“At Steelcase we know that the only way to provide the best products in the world is to ensure that they’re the best products for the world. That’s why every step of the way - through design, manufacture, delivery and product lifecycle - we consider the impact of our work on the environment and uncover opportunities to make things better.

Many of the components in our products are examined down to the molecular level to ensure they meet human and environmental health criteria. We are examining the chemical makeup of our products -- to 100 parts per million -- against 19 human and environmental health criteria. If we find materials of concern, we work to eliminate them.

We’re able to offer more Cradle to Cradle certified products than any other company globally - giving our customers greater assurance and choice.

To date, we have assessed over 600 categories of materials spanning across multiple product lines. And the work continues.

By measuring a product’s impact on the environment during all of its lifecycle phases – materials selection, production, transport, use and end-of-use – we’re able to target key areas to reduce our impact on the planet.

- Materials: What a product is made of and where the materials come from can make a huge difference in environmental outcomes.
- Production: From the time the raw materials enter one of our factories until the product is ready for packaging, opportunities abound to reduce environmental impacts.
- Transportation and Packaging: How a product is transported, what kind of packaging is used and the distance it travels can sometimes have the greatest environmental impact.
- Product Use: Just because a product is out of our sight doesn’t mean it’s out of mind. Even though our products have little environmental impact in use, we’re intent on limiting emissions and preserving indoor air quality for users. We also support maintenance and repair that can extend the product’s life.

In addition, we believe any product is only as good as the sum of its parts. We reach across our entire supply chain to collaborate and learn, advancing the science and practice of materials chemistry. This is an important part of our overall sustainability practices.”

- 300 lbs weight limit
- Available with 3D knit or upholstery on seat back

Amia is a hard working task chair designed to handle long hours of serious sitting

$445 / $465

THINK® By Steelcase

- 23" to 25"D X 27"W X 38" to 41.75"H Chair
- 23" to 25"D X 27"W X 43.75" to 53.5"H Stool
- Translucent 3D Knit back is available in 14 colors. Matching seat upholstery is available, or create your own from thousands of fabrics, leathers, and vinyls.
- Available with a fully-upholstered seat and back in any of the thousands of fabrics, leathers and vinyls. Two finish colors are available: black and platinum

Think is the chair with a brain and a conscience. It’s intelligent enough to understand how you sit and adjust itself intuitively.
**ADMINISTRATIVE ENVIRONMENTS**

**task chairs**

---

**LEAP®**

- 21.75" - 24.75"D x 27"W x 38.5" - 43.5"H
- 300 lbs weight limit
- Petite or Plus size (500 lbs) available
- Available with 3D knit upholstery on seat back

---

**SIENTO®**

- 26"D x 27 ½"W x 40" - 45"H
- 300 lbs weight limit
- LiveBack® technology flexes with you as you move and recline in the chair, for full support
- Adjustable back tension control lets you set the amount of resistance as you recline
- Flexible seat edge, relieves pressure on the back of the legs as you recline or lean forward
- Upright back lock
- Available in fabric only

---

The Leap chair’s back moves as you move and changes shape to mimic and support the movement of your spine.

Siento is designed for high-end work environments featuring a lot of technology inside. It is about making you feel good (its name means, “I feel”). Ergonomically intuitive, it moves as you move.
LEAP PLUS®

- 22.75” to 24.75”D x 31.75”W x 38.75” to 42.5”H
- 500 lbs. weight limit
- Available with 3D knit upholstery on seat back
- Same Alive Seating technology of Leap seating.
- Same functionality and aesthetic appeal as Leap seating, Leap Plus blends seamlessly into any office environment.
- The flexible backrest ensures that the back is always fully supported.
- Adjustable upper and lower back controls
- Seat takes the pressure off the spine when reclining.

CRITERION PLUS®

- Criterion Plus has soft curves and pleasing contours for all-day comfort. Criterion Plus features a 20% larger seat and back, added back support, higher density foam, reinforced frame, and high-pressure pneumatics to meet the needs of larger users, up to 500 pounds.
- 500 lbs. weight limit

FYI® Monitor Arms—in single or dual models—adjust quickly for workers on the go, without using any tools. This puts screens in the right position for any user and any posture, reducing eye and muscle strain, increasing user comfort and creating a healthier and more productive workplace.

FYI® By Details
- Designed to adapt to tomorrow’s changing technology
- Allows monitor to be positioned at the correct viewing distance and promote stress-free movement
- Tilt mechanism operates through a range of 20° backward tilt and 30° forward tilt
- Rotation allows for landscape or portrait viewing of monitor
- Built-in counter-balance tool for easy balance of the monitor
- Ships with 75mm/100mm VESA compliant mounting plate

FYI single flat panel arms are available with or without brackets.
FYI dual flat panel monitor arms are standard with brackets—C-clamp, through-mount, and c:scape.

$100 / $200
Options for every need.

M2 / M4 / M7 / M8
- M2: The most advanced fully articulating dynamic monitor arm on the market.
- M4: A dynamically adjustable monitor arm solution perfect for multiple-user workstations.
- M7: An award-winning monitor arm solution with almost infinitely configurable options.
- M8: A high-capacity monitor arm that supports the widest range of monitors available today.

M8 with Crossbar By Humanscale
- M8 supports two monitors – each weighing up to 20 lbs. – arranged side by side.
- Rugged, high-capacity construction supports dual-monitor applications with optional crossbar
- Built-in fine-tune adjustment ensures that double monitors line up perfectly
- Sleek, modern aesthetic complements any contemporary workstation
- Integrated cable management reduces unsightly cable clutter
- 180° stop mechanism prevents wall damage from over-rotation
- Counterbalances monitor(s) with simple hex screw adjustment
- Quick Release ball joint facilitates fast and easy monitor installation and removal
- Built-in security system provides effective theft-deterrent for public areas

$248
A high-capacity monitor arm that supports the widest range of monitors available today.
**NEO-FLEX ARM** By Ergotron

- Weight Capacity: 18 lbs (8.2 kg)
- Monitor depth greater than 2” (5 cm) may diminish capacity. Read more
- Mounting Options: Desk Clamp attaches to surface edge up to 1.8” (46 mm) thick; Grommet Mount attaches through hole up to 2” (51 mm) wide and up to 1-3/4” (44 mm) deep

---

**LX DUAL ARM** By Ergotron

- 13-inch (33 cm) height range meets the ergonomic needs of more than nine out of ten adults
- Extends LCDs out to 25” (64 cm) with an adjustment range of 18” (46 cm); push your displays out of the way when not in use
- Larger displays (e.g. 23” to 24” screen sizes) cannot be positioned in a stacked orientation; larger displays can only be placed side by side
- Weight Capacity: Individual monitor weight = 7–20 lbs (3.1–9.1 kg); maximum combined weight = 40 lbs (18.1 kg). Monitor depth may affect weight capacity

---

**LX SINGLE ARM** By Ergotron

- Cable management feature routes cables under the arm, out of the way
- Extends LCD up to 25” (64 cm); push your display out of the way when not in use
- 13” (33 cm) height range meets the ergonomic needs of more than nine out of ten adults
- Arm folds back over the base into a compact retracted position; perfect for tucking under systems furniture storage shelves or cabinets in space constrained areas

ergonomic accessories + adjustable-height tables

WORKFIT Single Monitor w/surface
By Ergotron

• Includes height-adjustment column, desk clamp, LCD pivot, worksurface, large keyboard tray
• Can be configured to hold a laptop instead of an LCD display: also order the LX Notebook Tray (50-193-200)
• * Weight Capacity: Maximum load on height-adjustment assembly = 18 lbs (8.2 kg), LCD pivot capacity = 6–16 lbs (2.3–7.3 kg), worksurface ≤ 5 lbs (2.3 kg), keyboard tray ≤ 5 lbs (2.3 kg). For proper operation the total weight of components when added together should not exceed 18 lbs (8.2 kg)
• Price contingent upon configuration

WORKFIT Dual Monitor w/surface
By Ergotron

• Includes height-adjustment column, desk clamp, crossbar, two (2) LCD pivots, worksurface, large keyboard tray
• * Maximum outside width of display is 24.5" (62 cm) when display is 2" (5 cm) thick. This range accommodates most displays with screens up to 24" as well as some displays with screens as large as 26". Actual allowable width of displays will vary slightly depending on display thickness. Note that older versions of this product used a narrower crossbar, which accommodated monitors with screens of up to 22"
• Price contingent upon configuration
ergonomic accessories + adjustable-height tables

KONTOUR, Clamp Mount Single Monitor
By Chief
- Sleek, solidly-constructed forged aluminum arms

Verb is an integrated collection of classroom furniture designed to support a full range of teaching and learning styles on demand.

**VERB**
By Steelcase

- Verb tables are specifically designed to support different learning modes and encourage easy shifts between lecture, discussion, and project work. Unique shapes promote interaction, while a variety of sizes allow Verb to work in any classroom.
- Chevron shaped table improves sight lines, encourages collaboration and helps define personal work area—even in lecture mode
- The team table is designed for group work that requires interaction and collaboration, while maintaining personal work space
- Side hooks hold whiteboards and backpacks, while the side dock becomes a platform for group collaboration
- A center dock holds personal items, markers or other classroom supplies and turns whiteboards into privacy screens for test-taking
- Leg shape allows students to pull up to the end of the table for collaboration without interference
- Standard casters and light weight allows tables to easily shift between lecture, discussion and project work
- **Price based on 24 x 60 chevron top with (4) legs**

### JORDAN
**by Krug**

- Jordan Multiple Seating is designed for fast, easy installation - and reconfiguring. A simple yet very strong fastening system allows product to be quickly and easily moved, re-installed, added onto, or reconfigured in a different layout. Linking tables can be dropped into, or removed from, multiple seating configurations without taking the seating units apart, and without defacing the seat frames. Tables are universal and non-handed, so can be changed to a reverse position.

- **Price based on single unit**

---

### MARCO
**by Nemschoff**

- Marco provides comfort and style in any healthcare environment. The sweeping curves of its arms and light scale offer elegance to a variety of settings. Marco is available as 1-, 2-, and 3- seat models with or without intervening arms. The Marco line is completed with coordinating tables and the complementary Marco Grande grouping.

- **Price based on single unit**

• It is required that the area where any new furniture is to be installed be free of existing furniture, boxes, and equipment. All computers and phones must be disconnected and moved out of the way, prior to the new furniture being installed. The moving of existing furniture by One Workplace will result in additional charges of $65.00 per man per hour.

• If you require One Workplace to move existing furniture a separate quote must be obtained prior to the furniture installation date. A separate purchase order must be issued to One Workplace for this service.

• For ease of delivery, specify the complete delivery address, including the room number on your UCSF Medical Center request for delivery form. In addition, provide the names and telephone numbers of two contact people in your department.

• Delivery and installation have been priced assuming free and clear access to the site without other trades in the space. Sites are to have adequate stairs, elevators, docks, floor surfaces, receiving areas, power accessibility, and heat. Additional costs may be incurred not completing to the above conditions.

• Scheduling arrangements for electrical and data personnel must be made by UCSF Medical Center personnel prior to the furniture installation.

• When the furniture installation is complete, it is the customer’s responsibility to bolt all bookcases, file cabinets, storage cabinets, etc... to the wall for seismic purposes.

• If wall mounted furniture is specified- (storage bins, tack boards, storage shelves, etc…) please verify with your facilities department that the walls have been properly reinforced with wall backing plates. If the walls need to be reinforced this must be completed prior to the furniture installation. One Workplace will not provide this service.

• Cancellations or changes before shipment and returns after shipment are extremely expensive and frequently not possible. A re-stocking fee of 35% + freight charges will apply to all Steelcase orders.

• A One Workplace Account Coordinator will contact you upon receiving the completed order to schedule a delivery and installation date. Furniture can be stored at no charge for 15 calendar days. After 15 calendar days, a storage fee will be charged.

• On installation day, please be present to inspect the furniture and assist the One Workplace installer in developing a punchlist, for damaged or missing furniture, or an incomplete delivery if necessary.
On the day of delivery, please take the opportunity to review the following checklist with the One Workplace installer.

- Check that all drawers open smoothly and close tightly.
- Insert all keys and verify that they lock and unlock properly.
- Turn on and off all light switches on task lights.
- Check for any dents or scratches in the metal, laminate, or wood furniture.
- Sit in each chair and test the pneumatic lifts- (the height adjustment), arms, and back.
- Each adjustment should move effortlessly.
- Examine the upholstery on all of the task and guest chairs. Look for any tears, rips, or stretching in the fabric.

Note any discrepancy on the delivery ticket and contact your One Workplace account coordinator immediately. Do not return to driver.

**Return Furniture:**

UCSF Medical Center may return a product to the supplier, subject to a restocking charge and the associated freight charge.

Furniture must be new and unused product, and meet the following conditions:

Product is returned in the original shipping cartons/wrapping if available or applicable.

The UCSF Medical Center customer MUST contact One Workplace within (5) days from the day of installation to request a “return goods authorization”-(RGA).

The UCSF Medical Center customer agrees to pay a 35% NET restocking fee for all returned product.

The UCSF Medical Center customer is responsible for ALL freight charges associated with the return of the furniture.

One Workplace will credit UCSF Medical Center customer for 65% of the invoice balance.

**Damaged Furniture:**

In order to expedite the replacement or repair process, report damaged furniture to the One Workplace account coordinator within 48 hours of the installation date.

Inspect furniture immediately on installation day. Check for scratches, dents, or upholstery tears.

One Workplace will order replacement parts immediately and keep you informed of the resolution actions.
Incomplete Delivery:

The UCSF Medical Center customer must compare furniture delivered to the order. Note any discrepancy on the One Workplace delivery ticket before accepting or signing the receiving document.

Contact the One Workplace account coordinator within 48 hours to report any missing furniture.

Furniture Damage or Errors discovered after the Delivery:

If you find that there is a problem with the furniture item received after the installation day, contact your One Workplace account coordinator who will help you to repair or replace the items as required. Under the terms of the UCSF Medical Center / Steelcase contract, all furniture purchased is under the contract warranty.

Should a problem fail to be resolved to your satisfaction, please consult the UCSF Medical Center website ____________ and follow the problem resolution process.
